

SMART CONTRACT ADDRESSES

This is a list of smart contract addresses the author was able to access. It does not include editions hosted on private collector platform addresses (editions on the VeVe.me platform, part of the Liechtenstein collection in the LI Stamp 4.1 app, part of the Gibraltar collection) or those where the collector does not have direct access to their cryptophilatelic asset on the blockchain, but only through a collector app. It includes most Cinderella Stamp collections, but may not include some private collections not issued by a national operator or without a licence from such an operator. As of 2 July 2026.
